APPLICATION GUIDE ECLIPSE

How To Apply Eclipse:

- Step 1.** Prep and Prime the surface as you would for any other paint job.
- Step 2.** Apply your choice of basecolors (white will product the most dramatic effect).
- Step 3.** Reduce the Eclipse 1:1 with Urethane Reducer.
- Step 4.** Apply 2 to 3 coats until desired effect is achieved.
- Step 5.** Air dry 15 min.
- Step 6.** At this time you can either continue with Candies etc. or move on to the final clear.
- Step 7.** Topcoat with our recommended clearcoat (Sun Screen Clear) as this clear contains a very strong UV Blocker to insure long life of the Eclipse basecoat.
